

KleenMaster High Pressure Cleaners - Petrol Engine

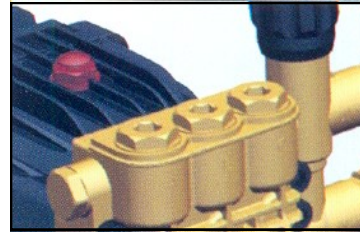

C160P

KleenMaster petrol-driven machines are mounted with large pneumatic tires for easy & smooth movement over uneven surfaces.

Proven, reliable and robust petrol engines power the KleenMaster range of pressure washers. They are designed to give countless hours of trouble free service.

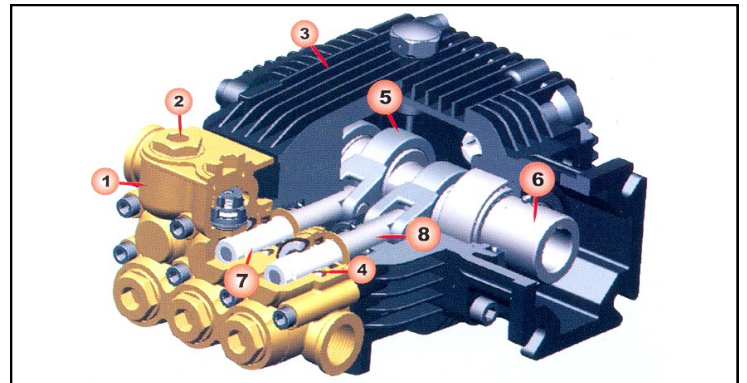

KleenMaster High Pressure cleaners features a heavy duty pump head with a pressure adjustable by-pass valve for long hours of continuous duty.

A heavy duty pressure gun with a stainless steel spray lance with bayonet mountings are supplied as standard.

C 200P

KleenMaster range of pressure washers features our Heavy-Duty DN range of pump heads. They come with 1) solid brass manifold, 2) Port plug with inner hex 3) anodized crankcase, 4) Super long life packing sleeves. 5) Oversized, one-piece connecting rod 6) Forged, precision grounded and hardened crankshaft. 7) Full ceramic plungers, stainless steel valves 8) Stainless steel plunger guide with heat treatment 9) Stainless steel valves for long life

Model	Engine	Pump Speed	Working Pressure	Max. Pressure	Water Flow	Tires Size	Dimension	Total Weight
C 160P	6.5 HP Petrol	3400 rpm	160 bar	185 bar	12.6 l/min	10" pneumatic	41 X 25 X 21 cm	45 Kg
C 200P	13 HP Petrol	3400 rpm	200 bar	245 bar	18.2 l/min	14" pneumatic	41 X 35 X 27 cm	60 Kg
